IVD Australia Annual Networking Event 2018
Friday March 2 at 7:30am
International Convention Centre, Sydney

IVD Australia invites you, your peers and your guests to join us for breakfast at the 2018 RCPA Pathology Update. This is a fantastic opportunity to meet with colleagues and customers and to hear about the latest news from the IVD space and how your association is working hard for you. CEO Dr Wendy-Jane Morrow will provide an update on the IVD Sector as well as provide an update on the Know Pathology Know Healthcare campaign.

Keynote Speaker: Professor Graeme Suthers, Director, Genetics, Sonic Healthcare (Australia)

Personalised Medicine and the Impact of Genetic Testing on the Future of Pathology

Recent advances in technology and the excitement of economic and fast whole genomic data offer the possibility to revolutionise the discipline of pathology. Genomic (and genetic) testing allows pathologists to diagnose disease rapidly and early to change its course, and to tailor treatment programs to the individual. This presentation outlines some of these technical advances and the changes that will make this revolution a reality.

Keynote Speaker

Professor Graeme Suthers

BSc (Med), MBBS, PhD, FRACP, FRCPA, GAICD

Director – Genetics, Sonic Healthcare (Australia)

Professor Graeme Suthers graduated in Medicine from the University of Sydney, where he went on to specialise in paediatrics. His interest in clinical and laboratory genetics was sparked by his interactions with children who had genetic disorders, so he spent five years doing genetic research in Adelaide and Oxford (UK) while also training to become a medical specialist in clinical genetics. He subsequently gained accreditation as a specialist pathologist in laboratory genetics.

Professor Suthers is one of Australia's most respected experts in the field of genetics. With an outstanding career and deep experience in genetics, healthcare and research, Graeme is nationally and internationally recognised for his expertise in genetic disorders, testing and clinical service provision. He spent 20 years working in Adelaide as a medical specialist, pathologist, and clinical researcher, before joining Sonic Healthcare as the Director of Genetics in 2014. His goal is to provide genetic services of the highest quality and utility to patients, families and managing clinicians.
